

What is Winnipeg's Forest Watch?

What is Trees Winnipeg's Forest Watch Program?

The Winnipeg Forest Watch Program is our campaign to monitor and raise awareness of invasive species, like emerald ash borer (EAB).

The Winnipeg Forest Watch group will give Winnipeggers the opportunity to have an active role in protecting our urban canopy. Volunteers will complete two surveys during the summer months. The first survey will include looking for trees that are stressed or in decline, while the second survey will be focused on locating trees that could be candidates for the City of Winnipeg's ash injection program. The data collected in each survey will be given to the City of Winnipeg to aid in the detection and management of EAB in our communities.

Approximate Survey days *(subject to change)*:

Welcome Workshop: Third week of June

Survey 1: Second week of July

Survey 2: Third week of August

Volunteer Appreciation Workshop: October
