

What is Winnipeg's Forest Watch?

What is Trees Winnipeg's Forest Watch Program?

The Winnipeg Forest Watch Program is our campaign to monitor and raise awareness of invasive species, like emerald ash borer (EAB).

The Winnipeg Forest Watch group will give Winnipeggers the opportunity to have an active role in protecting our urban canopy. Volunteers will complete two surveys during the summer months. The first survey will include identifying tree candidates for the City of Winnipeg's ash tree injection program. The second survey will be focused on looking for ash trees displaying cottony ash psyllid infestations. The data collected in each survey will be given to the City of Winnipeg to aid in the detection and management of EAB in our communities.

Events to attend:

- * June 22 10am-11:30am or 1pm-2:30pm
Workshop training and Survey 1
 - * August tbd Workshop training and Survey 2
 - * Volunteer Appreciation Workshop: data updates and food
- *dates and locations will be sent out by email to volunteers and posted on our website**
